

Department of Genetics
University of Wisconsin
Madison 6, Wis.

March 15, 1958

Dear Dr. Kunicki-Goldfinger:

I am pleased to learn that you will be visiting the U.S. this fall.

We will be very happy to offer you the facilities of our laboratory for a month in September.

Our own plans, at present, are to attend the International Microbiology Congress at Stockholm, returning to ~~Canada~~ Canada in time to attend the Genetics Congress at Montreal, and from there home. For this reason, it would be perhaps most convenient if you could postpone your arrival at Madison until a week or ten days after the Congress. This will perhaps afford you time to visit some other institutions en route, and will let me catch up on my paper-work before your arrival.

If this is agreeable to you, we can discuss further details at Montreal, and perhaps Stockholm as well.

I am very much interested in your remark about the inheritance of cold-induced resistance. Do you think it applies when the ϕ (F⁻) parent is the resistant one? Perhaps this is a point we should plan to clarify during your visit.

Yours sincerely,

Joshua Lederberg
Chairman, Department of
Medical Genetics

P.S. Will you require any assistance in securing an exchange-visitors visa or will that be arranged by Rockefeller?

Kunicki, W.
